CONNECTING ON CLIMATE & HEALTH

The 9th Annual NC BREATHE Conference brought together diverse voices to explore the critical links between our health and the environment, offering a platform for cutting-edge research, policy discussions, and community engagement.

FOSTERING COMMUNITY DRIVEN SOLUTIONS

We're partnering with communities across NC to protect air quality and push for change. We launched new air monitoring networks in Sampson and Mecklenburg Counties, equipping residents with tools to track pollution and demand stronger protections. We also supported community-led EJ efforts in Durham, Fayetteville, and Chapel Hill.

CULTIVATING ENVIRONMENTAL LEADERSHIP

CleanAIRE NC is invested in building a strong network of environmental advocates. Our new training workshop and in-depth advocacy manual equip individuals with the skills to effectively engage policymakers, mobilize communities, and champion clean air solutions.

CELEBRATING OUR PLANET & OUR PEOPLE

This year CleanAIRE NC and our partners hosted Charlotte's Earth Day festival! Over five hundred people came out to enjoy hands-on activities, environmental education, and outdoor family fun.

EXPANDING ACCESS TO CLEAN TRANSPORTATION

Through our partnerships we've installed several new EV charging stations in Charlotte's Historic West End, driving equity and sustainable mobility. We're also engaging with rural communities to address their unique transportation challenges and support cleaner transportation options.

CALLING FOR A CLEAN ENERGY CARBON PLAN

We mobilized hundreds of North Carolinians to join the fight for a stronger Carbon Plan, one that's centered around clean energy and community well-being.

ADVANCING ENVIRONMENTAL JUSTICE IN NC POLICYMAKING

CleanAIRE NC was honored to have Community Science Manager Daisha Wall appointed to Governor Cooper's Environmental Justice Advisory Council. Our representation on this council allows us to advocate for the needs of frontline communities and ensure that environmental justice is a priority in state policy.

GREENPRINTS FOR A GREENER CITY

We're teaming up with the City of Charlotte and Sol Nation to transform under-resourced communities through the GreenPrints initiative. By incorporating green infrastructure like trees, green roofs, and parks, we're tackling air pollution and flooding while creating healthier neighborhoods.

THE NEXT GENERATION OF HEALTH LEADERS

By equipping health professionals with the tools to identify and address environmental health concerns, we're empowering them to protect their patients and communities.
